

REMARKS

Claims 27-29, 33-35, 39-41, 45-47, and 51-56 are pending, with claims 27-29 being independent.

The drawings stand objected to for not showing a feature recited in the claims. Claims 27-29, 33-35, 39-41, 45-47, and 51-56 stand rejected under 35 U.S.C § 112, second paragraph as being incomplete. Independent claims 27-29 have been amended to obviate the objection to the drawings and the 112, second paragraph rejection.

As amended, claims 27-29 recite a display device that includes, among other features, a first signal input portion electrically connected to the gate electrodes of the first and third transistors. Support for this amendment is illustrated at least, for example, in Fig. 1B and the corresponding text on page 17, lines 11-12 of the specification. The amendment eliminates the need to amend the drawings because the recited feature is consistent with the drawings and specification. With the amendment, the claims includes the interconnections that are consistent with the drawings and specification.

For at least this reason, applicants respectfully request reconsideration and withdrawal of the objection to the drawings and the 112, second paragraph rejection of claims 27-29 and their respective dependent claims 33-35, 39-41, 45-47, and 51-56.

Applicants submit that all claims are in condition for allowance.
